

ANUSHKA PANDIT

Full Stack Developer · MERN · Cloud · Real-Time Systems

Lucknow, India | +91 8840369759 | anushkapandit0412@gmail.com | [linkedin.com/in/anushka-pandit-rura](https://www.linkedin.com/in/anushka-pandit-rura) | github.com/anushk2026a

PROFESSIONAL SUMMARY

Full stack developer with 1+ year of production experience architecting and shipping scalable web applications across the MERN stack, Next.js, TypeScript, and Django. Independently delivered a live B2B platform, an e-commerce platform, and a Jira-style project management tool for an international client, owning each end to end from architecture through deployment. Skilled in real-time systems (Socket.IO), cloud infrastructure (AWS EC2, S3, Nginx), and third-party API integrations.

PROFESSIONAL EXPERIENCE

Full Stack Developer

Feb 2026 – Present

DIFMO Pvt Ltd · Lucknow, India

- Architect and build full-stack features for production web applications using Node.js, Express.js, MongoDB, and React, owning both backend services and frontend integration.
- Design and implement RESTful APIs with modular routing, JWT-based authentication middleware, and Zod schema validation, powering multiple React client applications in production.
- Build and optimize MongoDB data models with Mongoose to support growing user traffic on high-read endpoints.
- Partner with UI/UX designers to translate Figma mockups into pixel-perfect, responsive React components, reducing integration rework cycles by ~30%.
- Debug and resolve cross-stack issues spanning the Node.js backend and React frontend, strengthening application stability and lowering production bug volume.

Trainee – Android & Server Infrastructure

Jul 2025 – Aug 2025

Netcamp Solutions Pvt. Ltd. · Ghaziabad, India

- Built an Android application in Android Studio with Firebase Realtime Database, enabling offline-capable data sync.
- Configured and deployed DNS, web servers (Apache/Nginx), and mail servers (SMTP, POP3, IMAP) on Linux, gaining hands-on IT infrastructure and server administration experience.

Python Backend Intern

Aug 2024 – Sep 2024

Softpro India Computer Technologies · Lucknow, India

- Developed RESTful backend APIs for an Online Admission System using Python and Django, implementing CRUD operations, form handling, and authentication workflows.
- Applied backend validation patterns — data integrity checks and structured error handling — to ensure reliable data persistence across MySQL-backed workflows.

PROJECTS

Shrimpbite — E-Commerce Platform — retailer.shrimpbite.in · Live on Play Store

- Engineered and shipped a full-stack e-commerce application with a Retailer Panel, Admin Dashboard, and real-time order and payout tracking, live in production.
- Implemented real-time order status updates via Socket.IO; integrated Razorpay for payments, Firebase Admin for OTP authentication, and FCM for push notifications.
- Deployed the backend on AWS EC2 behind an Nginx reverse proxy and the Next.js frontend on Vercel, achieving zero-downtime production releases.

Next.js (App Router), React, TanStack Query, Zustand, Tailwind CSS, Framer Motion, Node.js, Express.js, MongoDB, Socket.IO, AWS EC2, Nginx, Vercel, Firebase Admin, Razorpay, Cloudinary

Project Tracker — Team Collaboration Platform — project.incitedigital.com · International Client (Incite Digital)

- Sole developer of a Jira/Monday.com-style project management platform, built end to end for an international client and currently live in production.
- Delivered real-time collaboration via Socket.IO, drag-and-drop task boards (React-Beautiful-DND), and visual analytics dashboards (Chart.js).

- Implemented Google OAuth, JWT session management, file uploads (Multer + AWS S3 + Cloudinary), and automated email notifications via Nodemailer.

React 18, Redux, React Router v6, Material UI, Socket.IO, Chart.js, Node.js, Express.js, MongoDB, AWS S3, Google OAuth, Nodemailer

AMJ Star — B2B Order Management Platform — amjstar.com

- Built a TypeScript-first B2B marketplace with multi-role access control (buyer, supplier, reseller, admin), real-time order management, in-app Socket.IO chat, Razorpay payments, and Recharts analytics dashboards.
- Architected a modular Express v5 + MongoDB backend exposing 180+ Zod-validated REST endpoints across 25 feature modules, including orders, quotations, payments, wallet, cart, and CMS.
- Paired the backend with a React 19 + Redux Toolkit + TanStack Query frontend featuring role-based routing and a 401-refresh token interceptor.

React 19, TypeScript, Vite, Tailwind v4, Redux Toolkit, TanStack Query, Node.js, Express v5, MongoDB (Mongoose), Socket.IO, Zod, Razorpay, Cloudinary

World-CAD Backend — CMS & Portfolio API — worldcaddesign.vercel.app

- Developed a RESTful API powering a professional business portfolio, with high-security admin controls and a custom content management system.

Node.js, Express.js v5, MongoDB, Mongoose, JWT, Bcrypt.js, REST APIs

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python

Backend: Node.js, Express.js, Django, REST APIs, Socket.IO, JWT, Zod, Nodemailer, Bcrypt.js

Frontend: React 18/19, Next.js (App Router), Redux / Redux Toolkit, TanStack Query, Tailwind CSS, Material UI, Framer Motion

Databases: MongoDB (Mongoose), MySQL, Firebase Realtime Database

Cloud & Infra: AWS EC2, AWS S3, Nginx, Vercel, Firebase Admin (OTP, FCM), Cloudinary, Razorpay

Tools: Git, GitHub, Android Studio, Linux, Postman, Figma (collaboration)

Practices: RESTful API Design, Schema Design, Real-Time Systems, Agile/SDLC, API Integration, Production Deployment

EDUCATION

B.Tech — Computer Science Engineering · CGPA: 7.88 · 2022 – 2026

Ambalika Institute of Management & Technology, Lucknow, UP

- Presented research papers at the 7th International Conference (COII-2024) and the 9th International Conference (COAIEMA-2026).
- Published a literature review in IJCT (Vol. 12): “StyleNext — Just a Tap Away.”
- AIMT IEEE Web Master, 2023–26. Winner, Internal Hackathon 2023.

Class XII — 75%, CBSE Board, 2022 | Class X — 89%, CBSE Board, 2020
